15"-40" SlimLine LCDs

X-Top Triple Screen

Begin or grow from 2-32 screens

The patent-pending **X-Top scalable desktop multi-screen display** can scale from 2 to 32 screens in multiple rows with over 1,000 possible customizable configurations. Ergonomic per screen adjustments ensure the best customized viewing available and include: height, tilt, pivot, rotation and presentation mode. Professional cable management enhance overall performance.

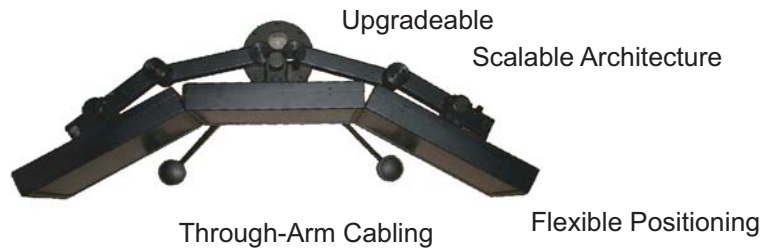

**9X Media's SlimLine LCDs** feature ultra thin frames to enhance image continuity and reduce eye strain. A wide selection of SlimLine screens ensures customized multi-screens systems for a wide variety of uses. Select from screens with multiple inputs including: DVI, analog, S-Video, digital, and RCA. Formats include traditional 4:5 and wide screen 16:9.

All X-Top systems come complete with **9X Media's Multi-Screen Manager Software Utility** which enables an intuitive interface and enhances multi-screen computing and productivity. The utility also provides for a variety of sophisticated features such as image mirroring as well as providing the ability of driving up to 32 screens from a single computer.

**An investment in 9X Media's Scalable Multi-Screens is an investment in the future of visualization.**

*"Our research shows that productivity gains for standard tasks, window management, switching between documents, you can get **productivity gains from 20% to 50%**."*

*What users find is that they know how to manage windows better... people find **multi-tasking to become more natural.**"*  
David Williams at Bill Gates' keynote speech at WinHEC

Customize with 15" to 40" SlimLine LCDs

X-Top Eight-Screen

All 9X Media Multi-Screens are customizable, upgradeable and interchangeable ensuring each user has the system which best fits their needs today *and tomorrow*.
