X-Wall SLIMLINE NINE SCREEN VIDEO WALL

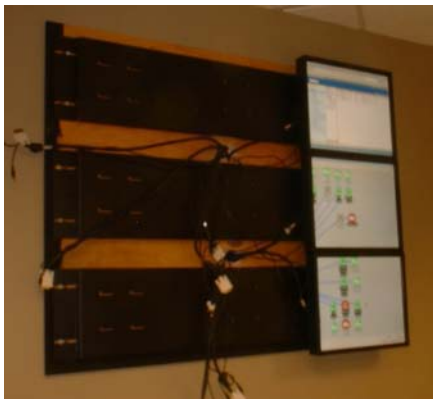

9X Media's X-Wall video wall with 19" SlimLine LCD screens

9X Media X-Wall Video Walls are easy to assemble and readily customizable to meet unique and demanding visualization needs.

This X-WALL is configured in a three-over-three array and can easily move around a room or facility.

9X Media SlimLine digital LCD screens provide high-performance, multiple inputs and slim bezels for the ultimate multi-screen experience. Screens shown are the SlimLine 19DX LCDs.

Front View
X-Wall Video Wall Display

This easily self-installable video wall can be customized to accommodate a variety of screen sizes, configurations and arrays. All cabling is hidden behind the video wall system and can be routed to another room as in this case. Here three of the total nine SlimLine Screens have been installed. An outer bezel as shown in the first photograph provides a final finishing touch to each system.

The components of the X-Wall video wall include: SlimLine high-performance digital LCDs, all mounting hardware, power supplies as needed, cabling and an outer bezel / frame.

9X Media's X-Wall video wall at ProNet Solutions

ProNet Solutions is a privately held company that provides network consulting services. Their core competency focuses on supporting distributed network systems containing Microsoft and Novell technologies. Major customers include banks as well as a variety of IT departments.

ProNet Solutions utilizes 9X Media's video wall to provide a central point of information and communication in their customer support center. This greatly enhances each team member's ability to quickly and easily gain access to vital information in real time and to respond individually or as a team to mission critical IT and NOC operations.
