

**9X Media X-Wall Video Wall - CASE STUDY – USA NASA
Headquarters, Washington DC – District of Columbia USA**

This 9X Media video wall, is a large-scale high-resolution collaborative visualization tool enabling collaboration, monitoring and control of mission critical NASA space and aeronautical information, graphics, video and programs essential to the goals and daily processes of this integral and forward-thinking USA agency.

This 12-screen 9X SlimLine LCD X- Wall Video Wall and its surrounding patent-pending cooling system and structure have been designed by 9X Media engineers and technicians ‘to spec’ for this high-profile, custom NASA installation.

NASA USA Headquarters in Washington DC

Utilized by NASA in their main floor conference and meeting room, this powerful 9X video wall solution can display a single image and/or video across all screens or can allocate any combination of inputs within individual screens while providing a user-friendly preset option to designated configurations and screens. This unit is completely modular and can be broken down for shipment in rugged 9X custom travel cases.
